

Music Mixer

There are many themes that have come to mind for the overall visual appeal to this project. The first is to go with a retro style music mixer feeling like its based in the 90's with 8 bit icons of musical instruments. Below is a link to a pintrest album to give a look into a possible style for the project.

The second theme that is also a possibility is retro-wave/synthwave outrun style with icons contrasting off of the bakcround. This style stands out as it has bright colours that all pop off of each other. Below are two links to two similar but different styles that could be implemented into the design of icons and the background.

There are other options to go with like a full modern theme but I think it would be fun to play with the 80's/90's styles and maybe link the style of instrument audio to the "techno" style music of that era.
